PRESENTATION OF HUIPU

2024 Year Heating & Cooling Season

Ningbo Huipu Electrical Appliance Co., Ltd
www.joanelec.com

GROWING OF HUIPU

Product Ranges:

Heating

- Ceramic Heater / Infrared Heater / Convection Panel Heater

Cooling

- Air Cooler/ Air Circulating Fan/ Multi-Cooling Fan

Mission

01

Durable quality

- Construction check at design steps before tooling
- First-class tooling open
- Fully safety testing before production
- IQC- in line QC and QA inspection - Running testing

03

Efficient communication

Basic of partner relationship, only smooth and sufficient contact with customers can go solve every challenges in long run.

02

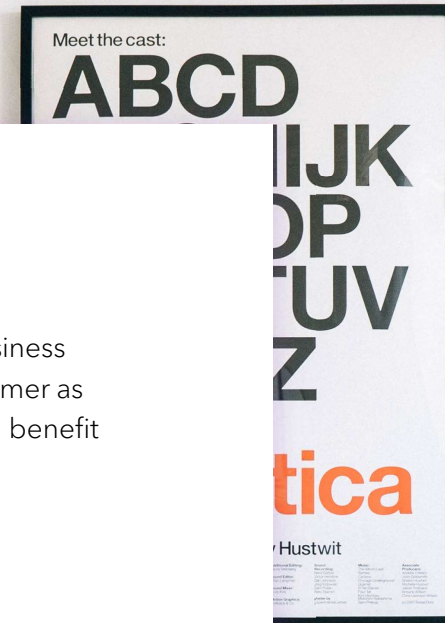

Value for Price

In concept of long-term business cooperation, treat our customer as partner and base on mutual benefit

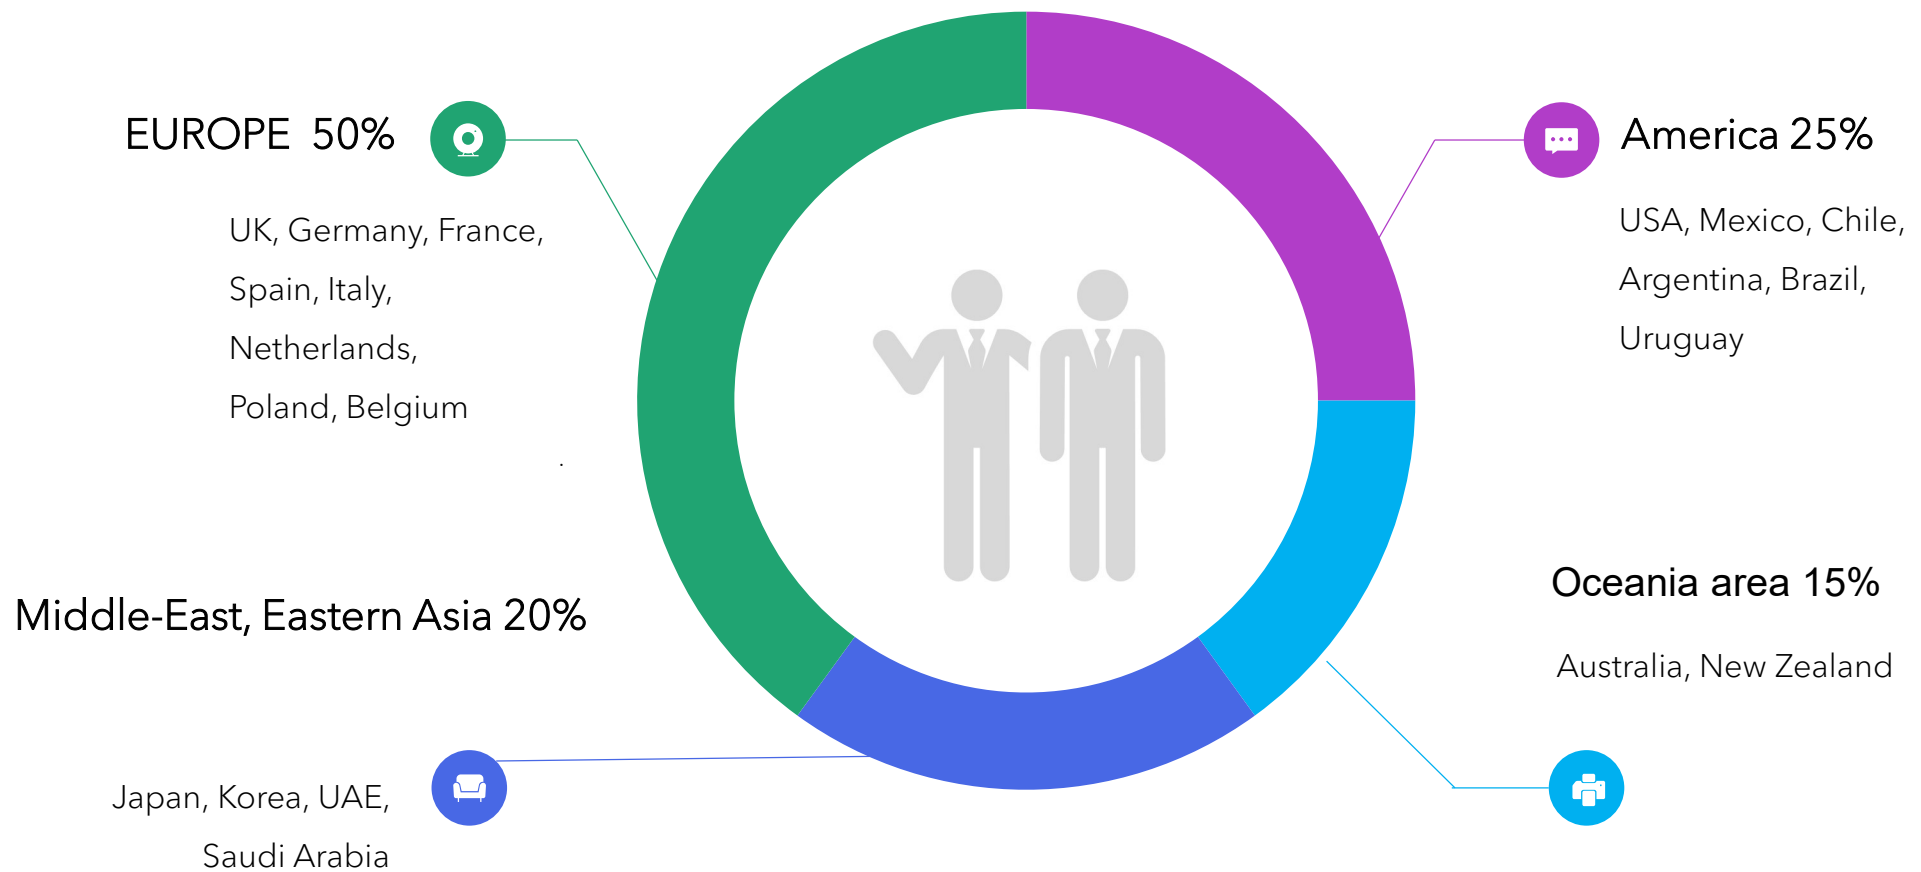

04

Exceed expectation

Bring over-expectation values to our customers constantly.

Export Markets Business analysis

Factory General Information

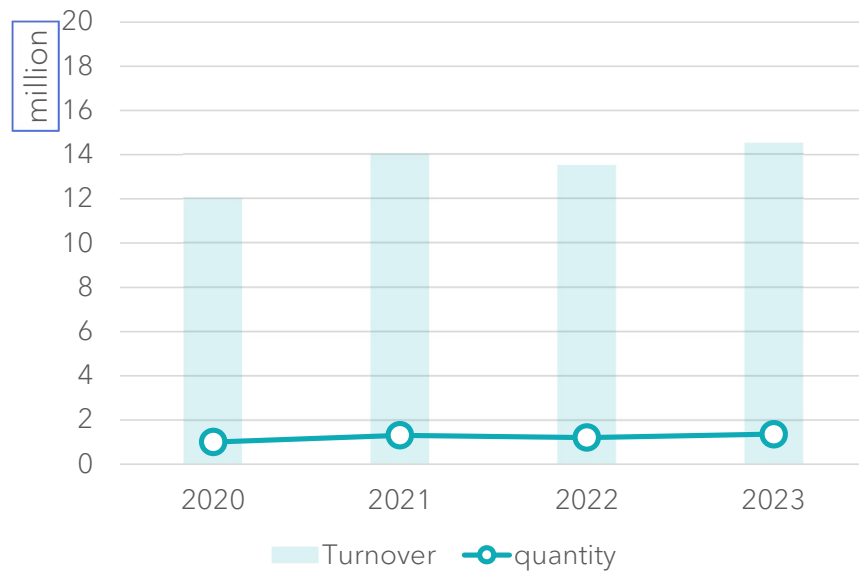

01 Factory: 5 Buildings, total 15,000 square meters
BSCI and ISO9001 Standard

02 Average 80 employees
Engineer: 5 persons
QA&QC: 8 persons

03 Yearly production Capacity:
Heaters: 1 million pcs
Air Cooler: 500,000 pcs

04 Certificates and Patents
BSCI and Sedex Member of the factory
Over 100 different Patents and Certificates

Business growth

Yearly Turnover

14 million USD in 2023 Year.

Yearly Production quantity

Produce over 1 million pcs totally in 2023 Year.

Strategic Customers and Partners

Production Procedure

(How to make the product Reliable and good quality)

Product design and developing

1. Do sufficient research from the online markets, like Amazon, Ebay or Customers' online platform.
2. Make correction and improvement on the points which the consumers are complaining
3. Construction review before tooling open.
4. Select first-class tooling factory to open the tooling

Safety testing and Certificate apply

1. Tooling adjustable to meet the safety testing if necessary
2. Do in-house fully testing to ensure it completely meet the safety standard before applying certificate
3. Select the well-know third party authority lab to apply the Certificates, ensure the products fully mee the target markets' standard requirments.

IQC and QC during Production

1. Inspect the spare parts, components and raw materials at in-coming stages
2. In-line QC to inspection 100% of the production units before packing
3. in-line QA to inspect the finished products randomly before storing.

Running Test

1. Do fully running test for each lot before shipment, to ensure the finished products reliable to use.

01.

02.

Factory audit and compliance

BSCI

Our factory do the BSCI audit in every year

Sedex member

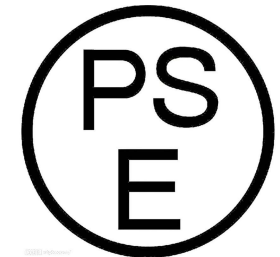

Sedex code: ZS407956425

ISO9001

Our facility comply the ISO9001 Standard.

Over 100 different Patents and Certificates

Evaporative Air Cooler

Air Circulating Fan

Multi-position Cooling Fan

Industrial Metal Fan

Portable Fan

Ceramic Heater

Infrared Heater

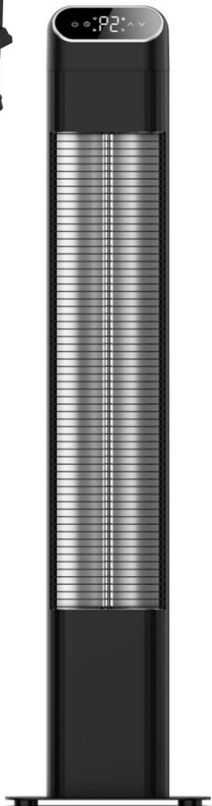

Convection Panel Heater

Mica Heater

Oil Free Column Heater

Best seller Product Proposal

Super quietly Heating

Use dual-DC Fan, extremely quietly and instantly heating

Proper thermostat design

Thermostat working properly, fan will stop and on automatically to maintain room temperature

Unique design for Atmosphere lights

Atmosphere Mood lights at top control panel, easy to read the working status, and can be turn-off separately for better sleep if necessary.

Digital Ceramic Tower Heater PTC-920L, 2Kw

Blue lights for Fan Mode

Purple lights for Low Heat Mode

Red lights for High Heat Mode

*New design model in 2022 year, sold very well in Europe, Japan, Korea, Middle East, Australia

New Product Proposal

Low Profile Heating

With turbo fan blower, create powerful and efficient low profile heating

Powerful

2Kw PTC Heating element, create instantly heating

New design

Matte ABS housing and PA66 Air out grill

Low Profile Ceramic Heater PTC-820, 2Kw

PTC Heating Element, Turbo Blower, powerful and instantly heating

*New design heater for 2024 year, suitable for floor heating and table-top heating

New Product Proposal

Oil Free Heating

Oil column design without Oil conduction, risk free of oil leakage

Powerful

2400W heating power, fast heating up and suitable for big room space

Novel design

LED display screen with Front tempered glass panel, elegant appearance

Oil Free Radiator Heater, CFH-25X, 2400W

1. Front tempered glass touch control panel
2. dual-Aluminum Heating element
3. High heating efficient and portable design

*New design heater for 2024 year, suitable for big room space: 25-30m²

THANKS

INNOVATIVE HEATING AND COOLING
