

- What is a good choice of Ceramic Fan Heater to the consumers?

The Top consumers' complaining on the Ceramic Heaters

Our solution to improve the performance of Ceramic Heater

01

Dual Quiet DC Fan

Use two quiet DC Fan to replace the single normal DC Fan, Control the Fan noise Limited Max< 48dB and Create High efficient Heat

02

Upgrade the procedure of thermostat control

Ceramic Heater will no longer blow out cold air once the room reached at pre-set temperature, maintain room temperature by Fan on-off automatically.

03

Unique design with atmosphere lights

The atmosphere lights with Blue/Purple/Red colors, you can read the working modes very easy even in far away.

Model:PTC-920L

✓ LED display
Touch control panel
ECO energy-saving Mode

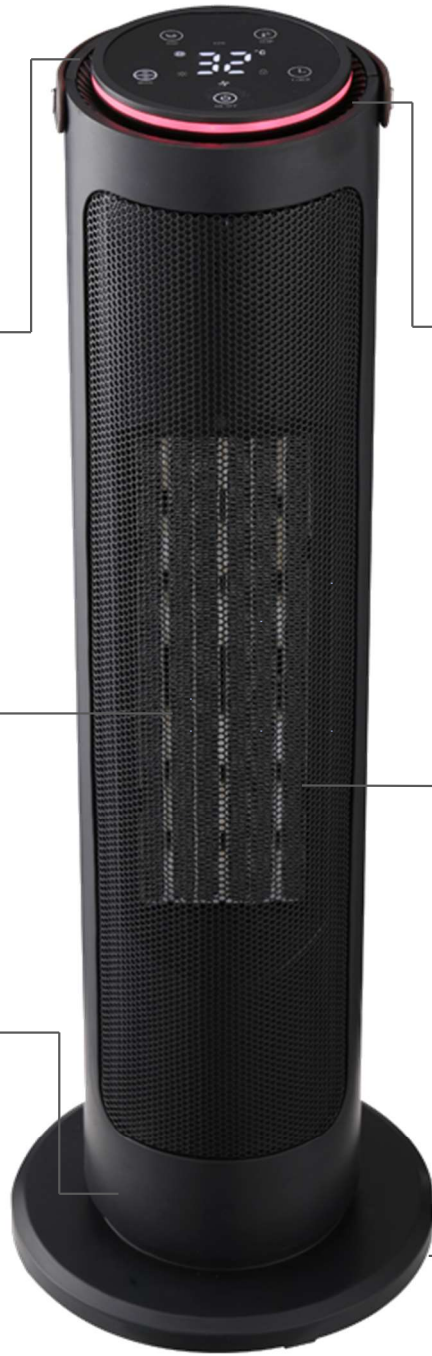

✓ Atmosphere Mode Lights:
Blue/Purple/Red

✓ Big PTC Heating element, instantly heating up

✓ Quietly Dual DC Fan, Powerful and efficient
(Fan Noise <48dB)

✓ Top-class Oscillating Motor
Reliable and smooth

✓ Built-in safety tip-over switch

Basic features

- 2 Heating power: 1200/2000W
- Electronic temperature control: 15-35C
- LED display and Touch control
- Cool wind available
- Oscillating
- Remote control
- 0-9 hours timer
- PTC Heating element, instantly heating
- Over-heat protection
- Tip-over switch
- Portable handle

Advance features

- Atmosphere Working Mood Lights indicator: Blue/Purple/Red
- ECO energy-saving Mode, heating in default design programs to save on energy consumption up to 30% max
- Key lock function
- Key to turn-off display screen or indicator lights independently
- Dual quiet DC-Fan system, Super quietly heating < 48dB and heat efficient
- Slimline tower design, no need to assemble, compact to saving space and storage
